DETAILED ACTION

Election/Restrictions

Applicant's election of species 1 in the reply filed on 2/11/2009 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 8 is rejected under 35 U.S.C. 102(b) as being anticipated by Hopkins (US Patent No.6, 007,086).

[Claim 8] Hopkins discloses a power source (44) located about the user, an electromagnetic (20, 28) device located on the boot (12), a ferromagnetic material (22,26) on an upper face of the snowboard or ski (12) and a transmitter (54), operatively connected between the power source (56) and the electromagnetic device (20,28), and being located about the user for sending a command signal to activate and deactivate said electromagnetic device, wherein the connection and disconnection of the boot relative to the snowboard or ski occurs by presence or absence, respectively, of

electromagnetic forces between the electromagnetic device and the electromagnetic material as controlled by the transmitter(col 8, lines 34-46).

Allowable Subject Matter

Claims 9-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
